

FLOWER POT COMPOSTER

INSTALLATION GUIDE

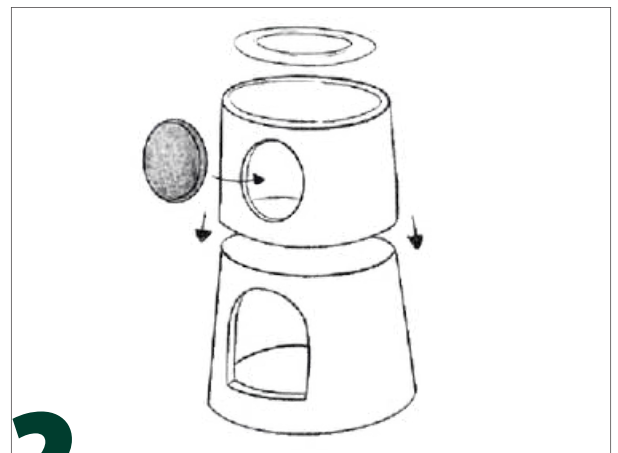

VIDEO TUTORIAL
We help you to build your Ceercle, scan the QR code to watch it.

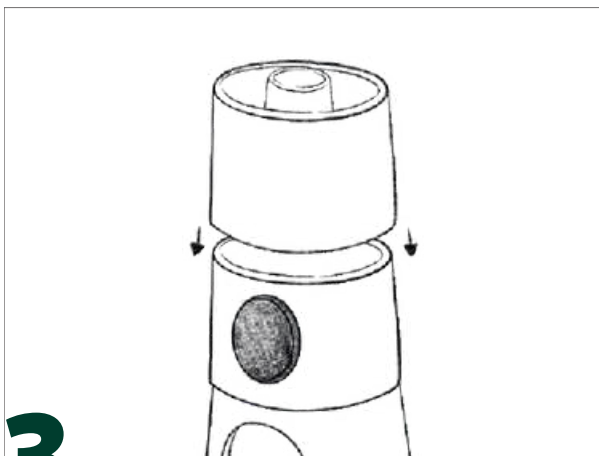

1.

Place the base of your Ceercle flower pot composter in the desired spot. The open part must be in contact with the ground.

2.

Place your compost floor on the base and close it with the cork stopper. Place the circular piece on the lugs, the flat-sided part downward.

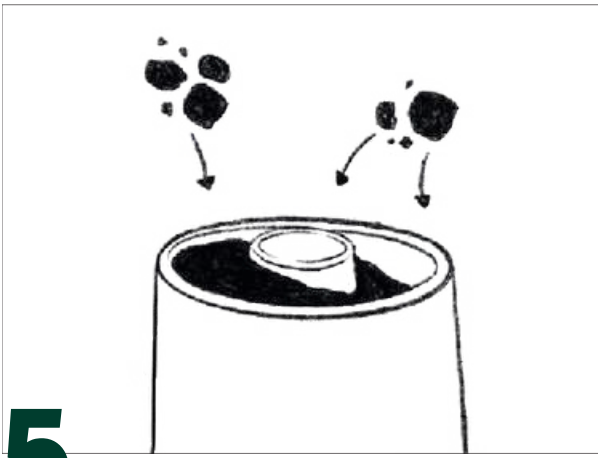

3.

Place the flower pot floor on the compost floor.

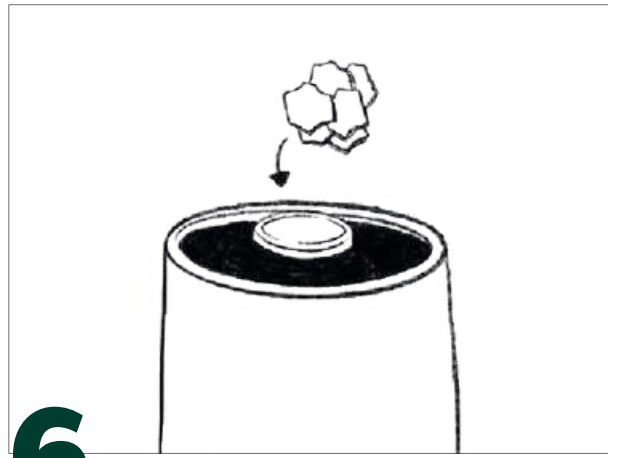

4.

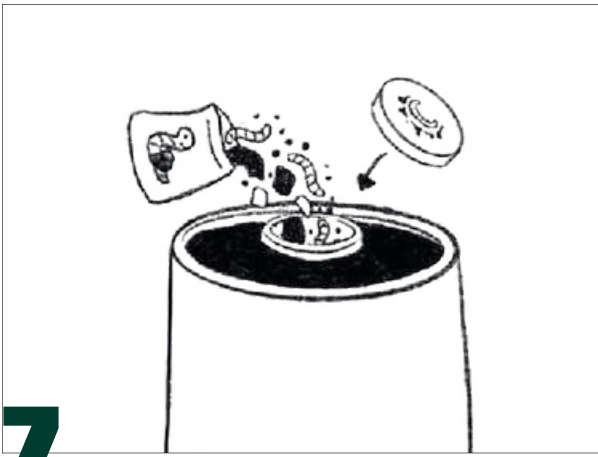

Place your potting soil bricks in a container and pour 1L of water. Wait a few minutes for it to absorb. Mix and repeat this operation until your potting soil is homogeneous and moist.

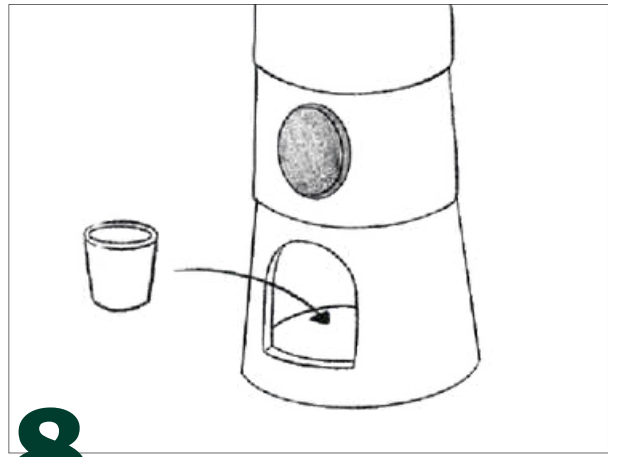

Put the rehydrated potting soil in your flower pot floor, around the column. Pay attention to not put it inside the column.

Cut three handfuls of cardboard into small pieces (e.g. from your delivery box). Place them in the central column.

Pour the compost worms from the bag into the central column. Close the top of the column with the terracotta stopper.

Place the receptacle on the ground at the center of the base. It will hold the compost tea that you will use to fertilize your plants.

9. START COMPOSTING

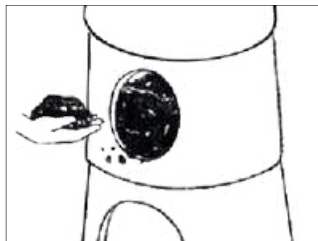

1. FEED YOUR WORMS

2. WATER YOUR GARDEN

3. HARVEST THE COMPOST

4. COLLECT YOUR COMPOST TEA
