VEGETABLE GARDEN COMPOSTER

## INSTALLATION GUIDE

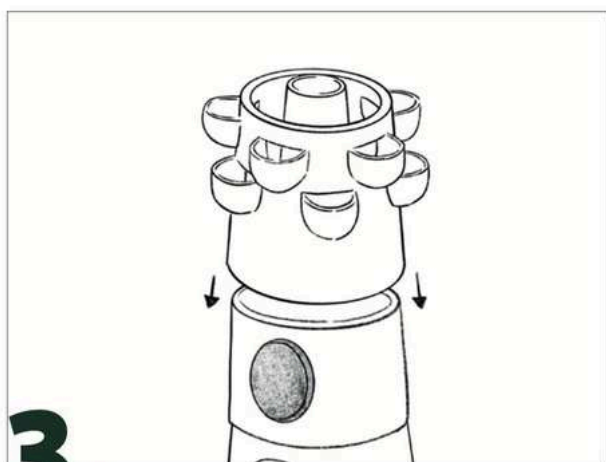

**1.**

Place the base of your Ceercle vegetable garden composter in the desired spot. The open part must be in contact with the ground.

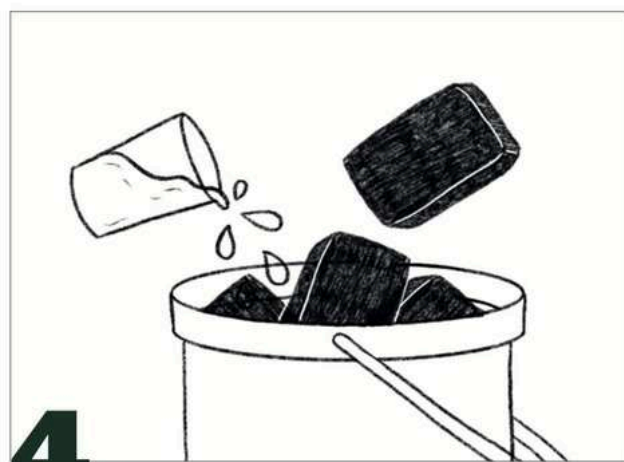

**2.**

Place your compost floor on the base and close it with the cork stopper. Place the circular piece on the lugs, the flat-sided part downward.

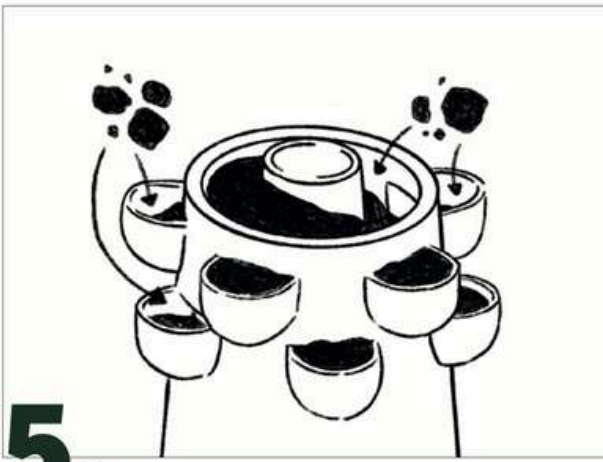

**3.**

Place the vegetable garden floor on the compost floor.

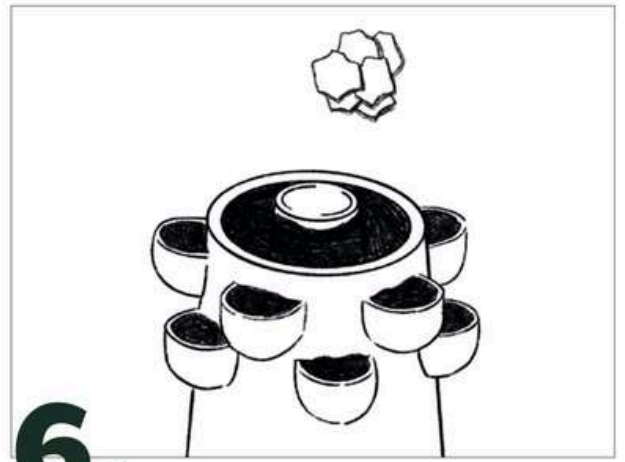

**4.**

Place your potting soil bricks in a container and pour 1L of water. Wait a few minutes for it to absorb. Mix and repeat this operation until your potting soil is homogeneous and moist.

**5.**

Put the rehydrated potting soil in the vegetable garden floor, around the column and in the compartments. Pay attention to not put it inside the column.

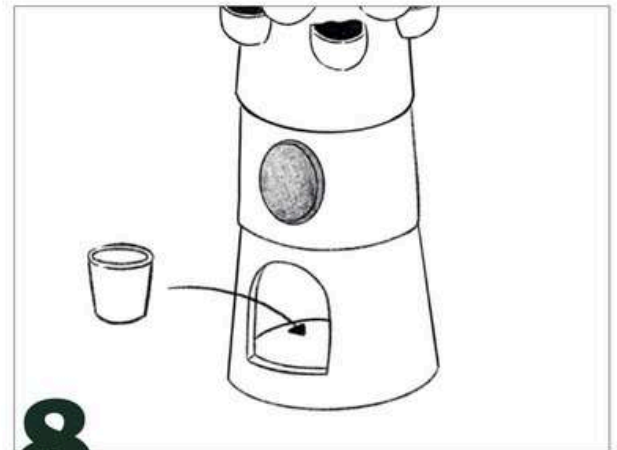

**6.**

Cut three handfuls of cardboard into small pieces (e.g. from your delivery box). Place them in the central column.

**7.**

Pour the compost worms from the bag into the central column. Close the top of the column with the terracotta stopper.

**8.**

Place the receptacle on the ground at the center of the base. It will hold the compost tea that you will use to fertilize your plants.

## 9. START COMPOSTING

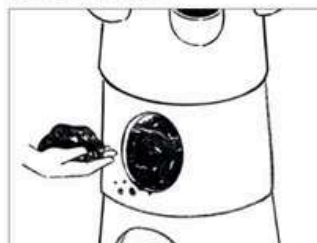

1. FEED YOUR WORMS

2. WATER YOUR GARDEN

3. HARVEST THE COMPOST

4. COLLECT YOUR COMPOST TEA
